SET YOUR SPACES APART WITH STYLE. AND SAFETY.

Clean Forward. Only from the Delta® brand. It's a portfolio of innovative products that ease cleanup, minimize contact or are completely touchless. Why? Because interacting with water is a daily part of life, and finding smarter ways to do so adds a new level of healthy practices to homes, projects and properties. Plus, there's nothing more these days that people will appreciate more than your help in protecting their well-being.

Welcome to a clean new day. We have a variety of forward-thinking solutions for living spaces and public settings alike, and we invite you to explore them here.

HELPFUL CHOICES FOR THE HEART OF THE HOME.

Cooking. Cleaning up. Connecting with family and conversing with guests. A lot goes on in today's kitchen, and the Delta® brand is right there. Not only to bring enjoyable convenience, but also to boost smarter, hygienic lifestyles.

VOICEIQ™ TECHNOLOGY

Delta VoiceIQ Technology dispenses exactly the amount of water needed with hands-free voice activation. Users can tell the faucet to warm the water, dispense a metered amount or even initiate a “wash hands” command.

TOUCH2O® TECHNOLOGY

Delta Touch2O Technology helps keep faucets clean, even when hands aren't. A touch anywhere on the spout or handle with a wrist or forearm activates the flow of water at the temperature where the handle is set.

GLASS RINSER

With high-pressure water jets that reach where people can't, the Delta Glass Rinsers thoroughly rinses residue in seconds. From baby bottles to wine glasses to travel cups, it conveniently rinses virtually any drinkware.

REFRESHING OPTIONS FOR THE BODY AND MIND.

To some people, it's a private retreat for escaping the cares of the day. For others, it's about washing up quickly and moving on. In either scenario, and all those in-between, we can help you elevate the style, functionality and cleanliness for homebuyers, residents and guests.

TOUCH2O.XT® TECHNOLOGY

Delta Touch2O.xt Technology helps keep your bathroom clean by giving you three ways to operate your faucet: manually with the handle, with a simple touch anywhere on the spout or handle, or by placing your hands near the faucet for a true hands-free experience.

SIMPLY BEAUTIFUL LUMICOAT™ FINISHES.

Delta® Lumicoat Finishes wipe clean without the need for cleaners and chemicals, resist water spots, mineral buildup and hard water stains, and are available across a range of finishes.

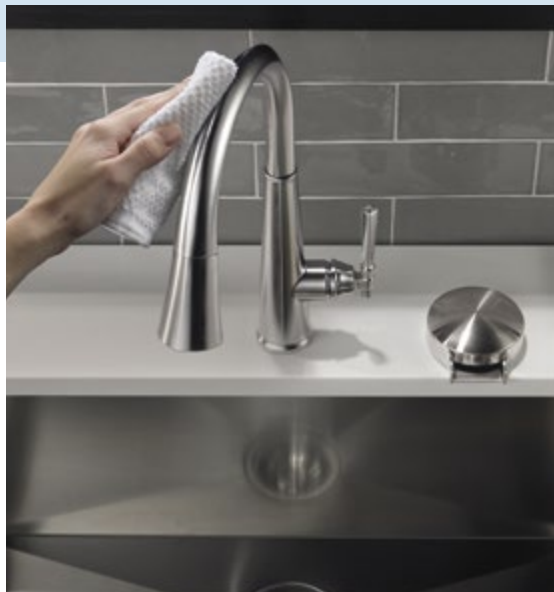

Without Lumicoat Finish

With Lumicoat Finish

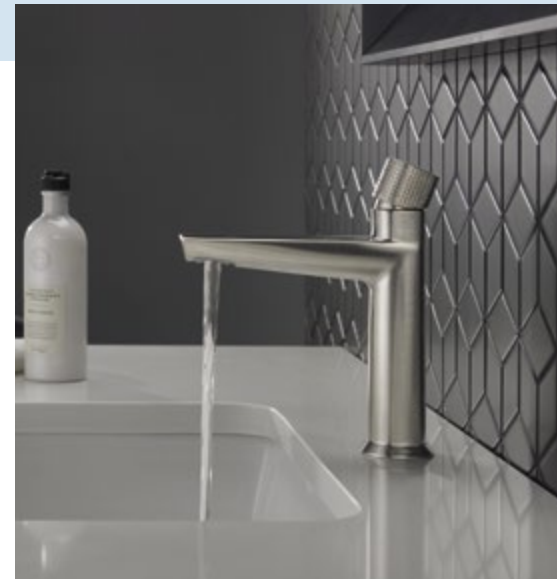

IN THE KITCHEN

Our faucets are designed to be eye-catching—and even a kitchen centerpiece. Lumicoat Finishes provide an ultra-sleek surface that repels liquids to keep faucets looking cleaner longer.

IN THE BATH

Keeping up appearances in the bathroom can be challenging. But not with Lumicoat Finishes. Applied to the most commonly touched surfaces, Lumicoat Technology helps maintain a faucet's beauty, day in and day out.

IN THE SHOWER

Our innovative Lumicoat Finishes are offered on showering products, so that a glistening look can be found throughout the entire bathroom.

SOLUTIONS THAT ARE AS ATTAINABLE AS THEY ARE PROGRESSIVE.

Advanced products from the Delta® brand bring cutting-edge technology and contemporary style to public spaces. These touchless solutions help promote health and safety. And better still, look to our faucets, fixtures and devices for easy installation, reliable performance and durable use.

PROXIMITY® SENSING TECHNOLOGY FAUCETS

This convenient technology for common spaces turns the entire faucet body into a sensor. Water turns on when a hand is placed near the spout.

H2OPTICS® SENSING TECHNOLOGY FAUCETS

Faucets equipped with our superior infrared technology bring consistent, dependable, hands-free operation to common area bathrooms.

HANDS-FREE INFRARED/SOLAR FAUCETS

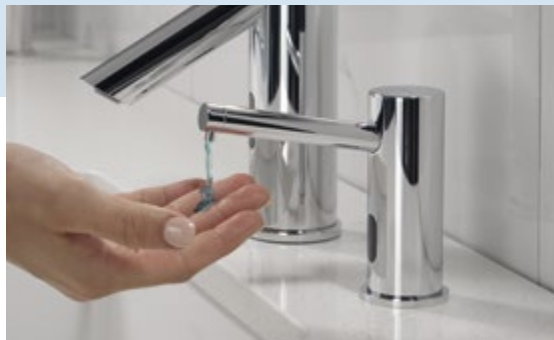

This lineup of faucets from the Delta brand combines the usability of infrared sensing technology and attractive contemporary styling.

With our solar lavatory faucets, you get the added benefit of energy-efficiency, as they draw power from natural and artificial light sources in their surroundings.

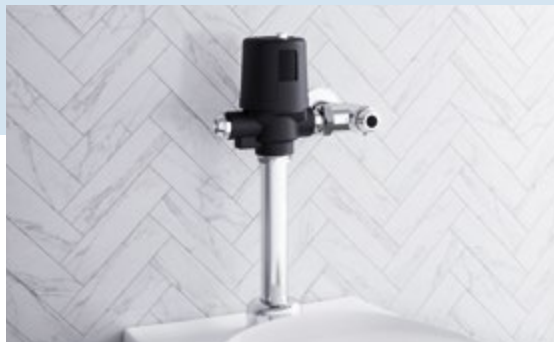

ELECTRONIC SOAP DISPENSERS

Our hygiene-minded solutions for your high-use common areas include options in electronic soap dispensers to help complete a coordinated look.

H₂OPTICS[®] SENSING TECHNOLOGY ELECTRONIC FLUSH VALVES

Delta[®] Electronic Flush Valves with H₂Optics Sensing Technology deliver sophisticated sensing for consistent operation, ease of installation and water-efficiency.

SOLAR ELECTRONIC FLUSH VALVES

Delta solar-powered flush valves harness ambient light energy to assist the batteries in operation of the flush valve—providing extended battery life and less frequent battery replacements.

THE SIMPLEST STEP TO GOING CLEAN FORWARD:

Connect with your Delta brand representative.

With a broad lineup of voice, hands-free and sensor technologies, you've got a lot of options—including choices in styles, finishes and configurations. Your local Delta brand representative is a knowledgeable expert who is ready to hear about your needs and recommend the best solutions from our extensive portfolio.
